# What's new in EngView Package Designer Suite version 5

**Version 5 lets users achieve greater work optimization and speed up the structural and graphic design**

## Adobe Illustrator

- EngView Package Designer version 5 is integrated with Adobe Illustrator CS4 and CS5. Now more than 1,500 ready-to-use Library resizable designs for folding carton board, corrugated board and ICB can be opened directly in Adobe Illustrator. Each standard is fully resizable, and users can edit its parameters in Adobe Illustrator to obtain a custom design
- In Adobe Illustrator, by using the integrated 3D Presenter module, the artist working on the project's graphic design can directly inspect the 3-D visualized artwork

The integrated EngView Package Designer enables designers to work with packaging design projects directly in Adobe Illustrator™

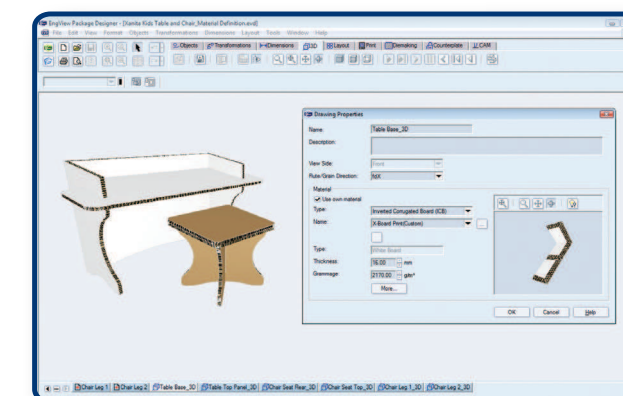

## Library of Designs

- Besides the standard international codes ECMA and FEFCO, the Library now supports also specially developed designs for Inverted Corrugated Board (ICB)
- A new Library section offers POP and POS displays

## Material Definition

- Version 5 offers an extendable catalog of folding carton board, corrugated board and Inverted Corrugated Board (ICB) materials. Each material is defined by its attributes and parameters and affects both the basic 2-D design structure and its 3-D visualization

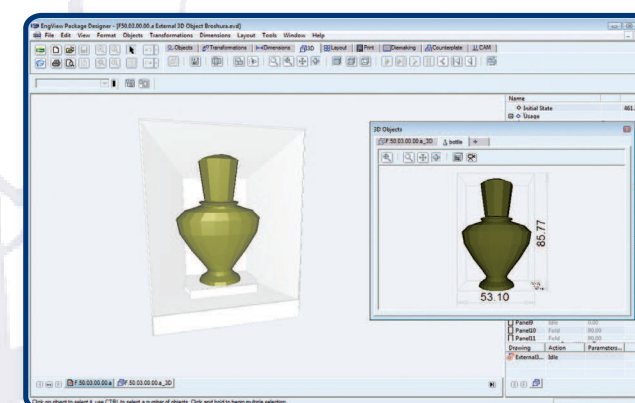

The use of materials is straightforward and reduces the overall design time

## External 3-D objects

- To streamline the design process, users can now import external 3-D models of the products for which structural design is being created. Once a part of the project, they can be smoothly assembled into the 3-D packaging model to help define a well-designed structure. The STL and the OBJ file formats are supported

The new 3D Presenter enables the importation of external 3-D objects. The representation is full and realistic.

## Box type recognition

- In work with imported structures, EngView Package Designer can search for the closest matches available in the Library of Resizable Designs. This functionality saves time in the process of design or re-design

## Our Upgrade Policy:

- All current customers who have a valid version 4 license are eligible for upgrade
- Promotional upgrade price: 15% of list price by 1 June of 2011
- Standard upgrade price: 30% of list price
- Upgrade price is based on currently licensed modules. Additional modules are offered at list price
- Upgrades can be ordered from your local reseller
